4.3   IT Infrastructure (30)

4.3.1 Institution frequently updates its IT facilities including Wi-Fi   (Marks-05)

Responses -

In the era of information communication technology it is very important for the college to adopt ICT facility for the quick access of information. In present situation it is said that a country which is rich in information is rich is each socio- economic sphere. Narayanpur district is called the "Entrance Gate for Abujhmad" the whole district surrounded by the forest. The internet connectivity and mobile network is very poor till 2016. There is a single mobile network provider that is BSNL. At that time even mobile network had been disconnected for one or two days. It is very difficult to use internet service via mobile phone. By Sanchar Kranti Scheme in 2018 Smart Mobile phone had been distributed to the college students by the state Government. After that one other mobile network provider that is reliance Jio has started providing internet and mobile network services. In 2020 our college get a broadband connectivity for providing internet facility in the college and improve the IT facility for the students and for the college.

For this our college has also set up a computer lab with 25 Computer connected with internet using local area network (LAN) connection. Our College provides 30 minutes to every student for the access of internet. They are using this facility for their information needs related to their course of study and also other reading materials.

In the session 2019-20 our college has changed three general classrooms into smart classrooms for making attractive teaching learning process. Wi-Fi facility is also available in our college. Apart from this some departments have also their desktop connected with internet facility for the access of e-resources and for other work. The office has also three computer systems connected with internet facility for the purpose of office related work and for making pay bills of the college staff. To provide the internet facility to the students of the college a Wi-Fi set up has been installed by the Chips but it is not started till now. By using the smart board students are seeing video lectures, demonstrations for practical related to the subject like Chemistry,

Geography, Botany, Zoology, Computer Science, Physics etc. Sometimes motivational videos are also showing to the students for motivating   them in difficult situation.
